

# CREATING A NEW PAGE

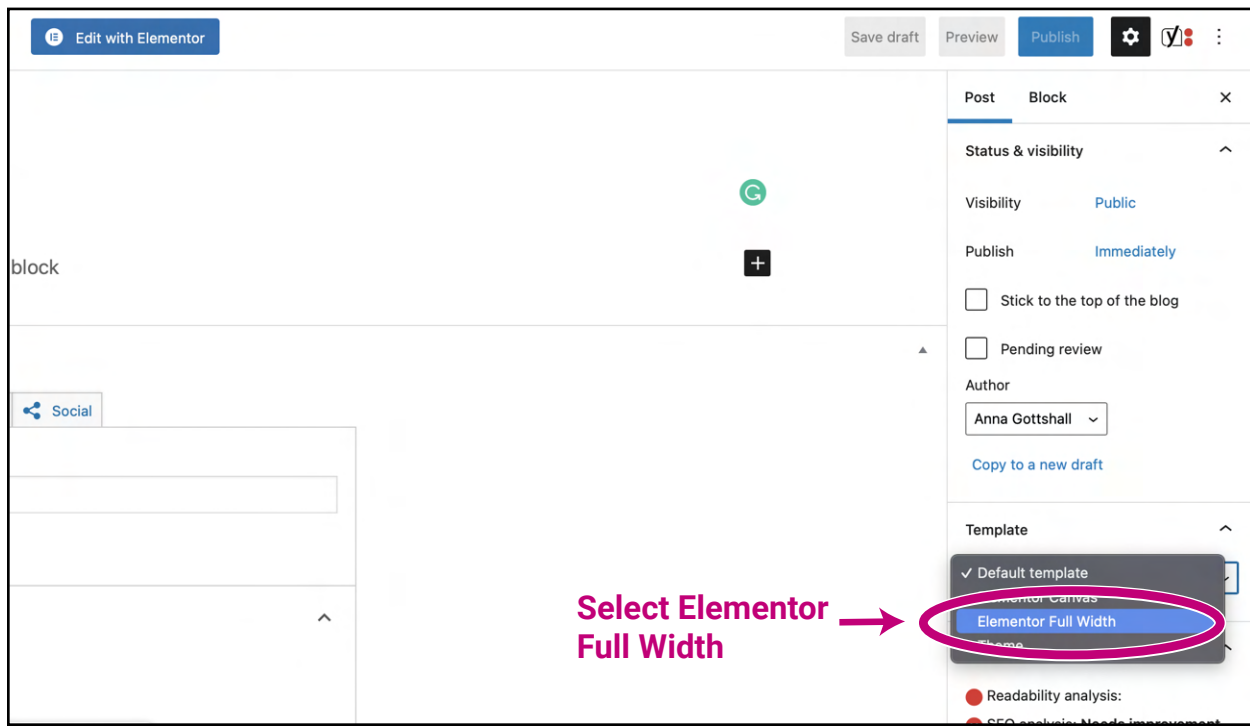

1. Sign in if necessary (See [Page 1: "Signing In"](#)) and access the "Pages" page (See [Page 7: "Accessing Pages"](#)).
2. Under either "Pages" click "Add New".

3. You will be brought to the new page or post dashboard. Here you can give the page a new **title**. Next, find the sidebar on the right and scroll down to "Template". If the sidebar is hidden somehow, click the **gear** symbol on the top of the screen.

4. Click the dropdown under "Template", then scroll down to and click "Elementor Full Width".

5. Finally, click "Edit with Elementor".
