

# WIDGETS: CREATING HEADINGS:

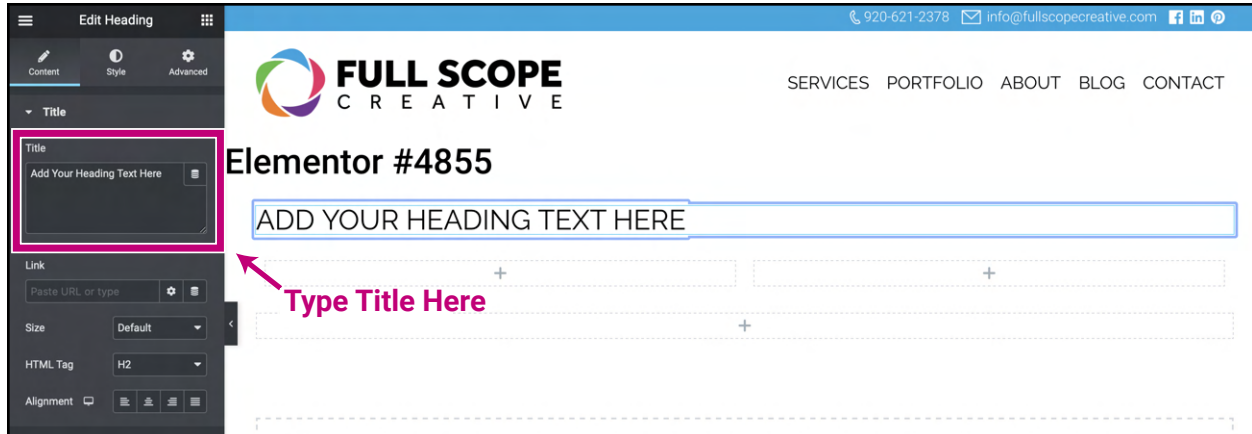

1. To add a heading, first ensure the **"Elements"** tab is selected on the editing sidebar. To get there, select the **nine small squares** at the top of the sidebar next to the word **"elementor"**. All the widgets are stored there.

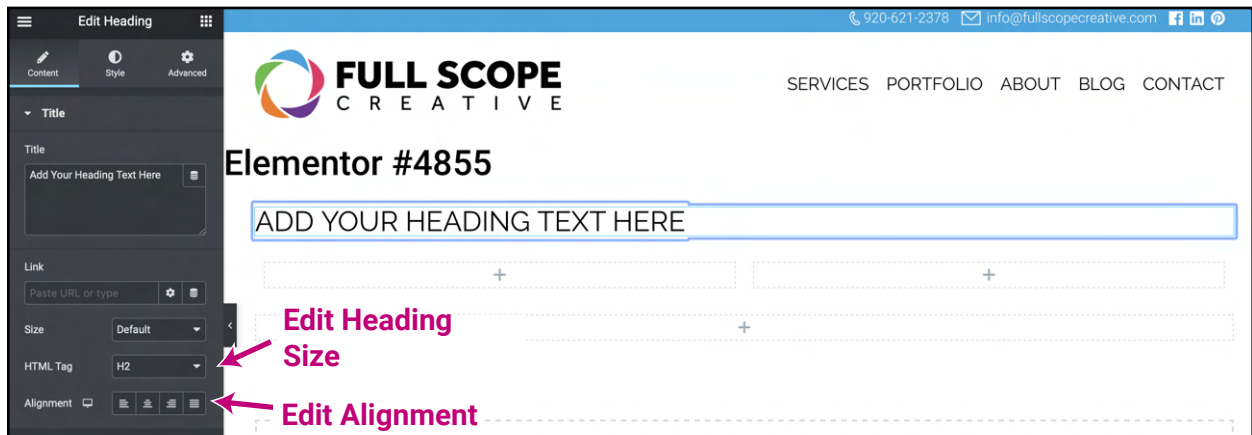

2. Click and drag on the heading widget under the **"elements"** tab. Place it over the section and a blue highlighted area will appear, drop the widget inside.

3. A Heading text editor will appear in the left preview side, as well as an **“Edit Heading”** screen on the editing sidebar. Type all of the edits in the editing sidebar inside the textbox.

4. For further edits, change the heading style size by selecting **“HTML Tag”**. To alter the alignment, find where it says **“Alignment”** and you can select one of the optional alignments.

5. After all edits are completed, click the green **“Update”** button.
